Capture stunning imagery with a legendary Hasselblad camera and enjoy smooth flight with omnidirectional obstacle sensing. Every improvement on Mavic 3 sets a higher standard for aerial photography. Fly with Mavic 3 and discover imaging above everything.

### *Two cameras, unlimited possibilities*

The iconic Swedish brand Hasselblad designed and built the L2D-20c aerial camera just for DJI Mavic 3, embedding a professional-grade 4/3 CMOS in an unbelievably compact space. Rigorous Hasselblad standards are applied to both hardware performance and software algorithms, bringing imaging quality to an entirely new level.

The tele camera can be used to frame shots or explore. Whether capturing landscapes or people, enjoy more flexibility and creative potential.

### *Hasselblad L2D-20c camera:*

- 4/3 CMOS Sensor
- 20mp photos
- 12.8 stops dynamic range
- f/2.8-f/11 adjustable aperture
- 24mm equivalent focal length
- VDAF - vision detection autofocus technology

### *Tele camera:*

- 28x Hybrid zoom
- 162mm equivalent
- f/4.4 aperture

### *Hasselblad Natural Colour Solution*

Mavic 3 features the Hasselblad Natural Colour Solution, the culmination of decades of photographic experience that delivers vivid, natural colors with the simple press of the shutter.

### *Professional video specifications*

- 5.1K Video Recording
- DCI 4K/120fps
- Supports Apple ProRes
- 10-bit D-Log
- HLG
- Night Shots Video

Mavic 3 not only records aerial videos at high resolutions and framerates, it also captures up to 1 billion colors with a 10-bit D-Log color profile. This delivers more natural gradations of sky coloring with more details retained for greater flexibility in post-production. Mavic 3 Cine provides extensive options for professional creators. It supports Apple ProRes 422 HQ, Apple ProRes 422, and Apple ProRes 422 LT encoding with a maximum data rate of 3,772Mbps.

It also comes with a built-in 1TB SSD and a 10Gbps lightspeed data cable to further facilitate professional filming and creation.

### *Omnidirectional obstacle sensing*

Mavic 3 helps you to enjoy collision-free flight so you can focus on getting the best shots possible. Multiple wide-angle vision sensors work seamlessly with a high-performance vision computing engine to sense obstacles in all directions precisely and plan a safe flight route that avoids them.

### *Advanced RTH*

Always end on a high note with Advanced RTH. This updated auto-return function enables Mavic 3 to automatically determine the optimal route back to its home point and execute it quickly.

Mavic 3 can fly to a designated altitude and then find a safe and efficient route back to its home point, combining the advantages of Advanced RTH and traditional RTH, allowing users to choose the best option according to their environment.

## ***Don't just fly. Enjoy.***

Mavic 3 makes flight more fun than ever with recording that is no longer interrupted by obstacles along the way. When flying, Mavic 3 continually senses objects in all directions and bypasses them quickly and smoothly.

Control Mavic 3 to fly in any direction without having to continually press the control sticks.

This not only makes long-distance flight more effortless, but also helps reduce shakes during manual control for smoother camera movement.

The Waypoint Flight function brings the automated flight experience to new heights. Mavic 3 can automatically plan a flight route based on the waypoints preset by the user, and can precisely repeat routes.
