Beskrivning:

SmallRig 2065B Articulating Arm 5.5"

- It is equipped with 1/4" screws on both ends respectively
- Rubber cushion which could prevent the scratches of monitor and help to lock the monitor tighter
- Ergonomic wingnut for great convenience that could help to adjust any angles based on your needs

It is equipped with 1/4" screws on both ends respectively. Thus, it could attach monitors via the 1/4" screw on the one end and attach accessories with 1/4"-20 threaded holes on the other end, like NATO Rail 1973, 15mm Rod 1182 and Quick Release Rod Clamp 1976, etc.

Mounted with 1/4" screw is a rubber cushion that protects monitors from scratches and helps to lock the monitor tighter. It features an ergonomic wingnut for great convenience that could help to adjust any angles based on your needs.

Compatibility:

- Universal
