Beskrivning:

Sekonic Litemaster Pro L-478DR for Elinchrom

Sekonic's LITEMASTER PRO L-478-Series meters are the world's first touch-screen-operated light meters. They have an array of unique, must-have features for both still and motion story tellers.

Their compact size is both instantly familiar and comfortable to use. A large LCD (2.7") displays ambient, flash, cine and a host of other information in a clear and understandable way. Settings are made by simply touching or sliding a finger over the screen.

The L-478 meters can be quickly calibrated to your camera using Sekonic's Data Transfer software and either Sekonic or X-Rite Brand targets or by manually inputting data to the DTS program or on the meter itself.

Keeping pace with wireless advancements, the L-478DR-EL comes complete with exclusive Elinchrom Skyport technology which combines light measurement and flash power control providing amazing control in your hand.

The L-478DR-EL has a radio module and antenna built into the meter. The system transmits at 2.4GHz and uses signal protocols that are unique to Elinchrom's Skyport wireless triggering/control system.

Specifikationer:

Tillverkare	Sekonic
