Beskrivning:

Unlike Sekonic exposure meters designed for photographic use, the Sekonic Illuminometer i-346 is a light meter that displays light values in lux and foot-candles.

Simple, versatile and easy to use, the Illuminometer i-346 monitors illumination levels incrementally wherever you need it:

- Industry: workplace illumination
- Government: health standards
- Police: safety
- Sports: conformance to standards
- Construction: worker safety
- Museum/ Gallery: display illumination
- Agriculture: regulation of light for best growing
- Movie/TV/Theater: control of dramatic lighting

With its compact size and simple AA battery power source, the small yet rugged i-346 light monitoring meter fits in your shirt pocket, making it easily transportable under almost any conditions or working scenario.
