Beskrivning:

Zhiyun Weebill 3

- New sling design with wrist support and a low overall weight
- Supports larger full frame setups like the Sony A7S III + 24-70mm f/2.8
- Built-in microphone and a powerful LED (1000 lumens)
- The 10th generation algorithm provides 30% increased stability
- Powerful battery that lasts for 21 hours

The new Weebill 3 incorporates a brand-new SLING 2.0 design for improved ergonomics, built-in microphone, fill light and a powerful, inbuilt battery supporting all-day use. The Weebill 3 upgrades the filmmaking and photography experience by giving a dynamic, lightweight and easy-to-use professional device, giving users the chance to abandon the stress of cumbersome equipment in order to focus on pure artistic creation.

The new SLING 2.0 system incorporates three important ergonomic upgrades: a restructured L-shape handle that's more stable when self-standing, a new wrist rest, and a repositioned, extendable sling grip that provide over 40% more support to your wrist by shifting the weight onto your arm. The extra support reduces fatigue, allowing for extended use in comfort.

By moving the sling grip to the bottom of gimbal, it provides better stability and shake-prevention when shooting at low-angles. The grip includes thumb buttons, mini control stick for movement, plus finger trigger and wheel that can be customized according to preferences of shooting modes and action parameters, such as camera paras, movement along axes, follow focus etc.

The Weebill 3 includes a built-in microphone and 1000 lumen fill light for a fast and efficient setup-to-shoot experience. These convenient, high-performance add-in accessories save filmmakers from the fuss of additional wires and the weight of extra accessories. The built-in microphone provides forward focused cardioid recording, with noise-cancelling functionality, while the bright fill light offers color temperature adjustment of 2600-5400K to meet the requirements of each scene.

Compared to the previous version, the WEEBILL 3 now has a powerful 7,800mAh internal battery, which now provides up to 21-hours use for all-day filming support. With support for PD fast charging (0-100% in 2 hours) and pass-through charging of attached cameras (5V/1A), the Weebill 3 offers outstanding endurance with minimal downtime.

In the box:

- 1 x Weebill 3 Gimbal
- 1 x CR120 Tripod
- 1 x Quick Release Plate (Double-layer Quick Release)
- 1 x Lens Support
- 4 x Fill Light Filter
- 1 x USB Charging Cable
- 1 x Sony Control Cable LN-UCUS-A03
- 1 x Canon Control Cable LN-MBUC-A02
- 1 x Canon Control Cable LN-NBUC-A01
- 1 x Panasonic Control Cable LN-UCUC-A02
- 1 x Quick Start Guide
- 1 x EPP Storage Case

Goecker for shooters
